Career Objective

I am a motivated and detail-oriented Computer Science graduate specializing in Information Security from the University of Rwanda. With a strong academic foundation and multiple industry-recognized certifications, I have developed a unique skill set that bridges the gap between cybersecurity, networking, and full-stack development. My academic journey and professional training have provided me with an in-depth understanding of secure system design, network configuration, and software development best practices.

My career objective is to apply my technical expertise and problem-solving skills in a challenging and dynamic role within the technology industry. I am particularly interested in opportunities that focus on network security, cybersecurity analysis, and software engineering, where I can contribute to building resilient systems that protect against evolving cyber threats. Beyond technical expertise, I bring strong teamwork, adaptability, and a passion for continuous learning, which I believe are essential qualities for success in the fast-paced tech world.

Education

Bachelor of Science in Computer Science (Information Security Specialization)

University of Rwanda – Kigali, Rwanda

2024

During my studies, I focused on key areas such as cybersecurity, computer networks, programming, and secure application design. I was actively involved in academic projects that required implementing secure coding practices, configuring networks, and analyzing vulnerabilities in different environments. This academic background has laid the groundwork for my professional aspirations in cybersecurity and IT infrastructure.

Certifications

- **Cisco Cybersecurity Essentials** – Gained fundamental knowledge of cybersecurity principles, threats, and protection mechanisms.

- **Cisco Enterprise Networking, Security, and Automation** – Acquired hands-on skills in advanced networking and automation techniques.
- **Cisco Introduction to Networks** – Built a foundation in network architecture, addressing, and connectivity.
- **Cisco Switching, Routing, and Wireless Essentials** – Learned practical skills in configuring, managing, and troubleshooting enterprise networks.
- **NDG Linux Essentials** – Developed proficiency in Linux systems, command-line operations, and administrative tasks.

These certifications not only validate my technical knowledge but also demonstrate my commitment to professional growth and staying updated with industry standards.

Technical Skills

Programming & Development: Proficient in HTML, CSS, JavaScript, and TypeScript, with experience in Material UI for responsive interfaces. Skilled in backend technologies including Node.js and Express, as well as relational database management using PostgreSQL. Familiar with Git for version control and collaborative software development.

Cybersecurity & Networking: Strong foundation in network configuration, routing, and switching, with an emphasis on security and risk management. Practical experience in vulnerability assessment, secure networking principles, and intrusion prevention. Proficient in Linux administration, enabling effective system configuration and security management.

Languages: Fluent in English, conversational in French, and native in Kinyarwanda, enabling effective communication in multicultural environments.

Experience & Projects

Full-Stack Development Projects:

- Designed and developed responsive web applications using modern frontend technologies such as **HTML, CSS, JavaScript, TypeScript, and Material UI**. These projects demonstrated my ability to create intuitive and user-friendly interfaces.
- Built **RESTful APIs** with **Node.js and Express**, integrated with PostgreSQL databases, ensuring secure and efficient data handling.

- Used Git for version control, collaborating effectively with team members, and maintaining clean and organized codebases.

Cybersecurity & Networking Practice:

- Applied networking knowledge using Cisco Packet Tracer to configure secure and optimized network environments.
- Practiced real-world scenarios in threat detection, vulnerability assessment, and system hardening to mitigate risks.
- Gained hands-on experience with Linux environments, applying essential security practices to enhance system resilience.

Additional Information

Currently based in Kigali, Rwanda, I am open to relocation and remote work opportunities. I am passionate about building secure systems, solving real-world problems with technology, and contributing to organizational success through both **cybersecurity and software development expertise**. I take pride in being a fast learner who enjoys taking initiative, and I am committed to professional excellence.

In addition to my technical abilities, I bring a collaborative mindset, adaptability to new challenges, and a drive for innovation. I am eager to contribute to forward-thinking companies that value creativity, security, and long-term growth in the ever-changing digital landscape.
